Mr. Berkner:

I am writing as counsel for the Native Village of Tyonek to request the groundwater model files that are described on Page 14 in the 2013 Arcadis report: "The program Groundwater Vistas version 6.20 (Environmental Simulations, 2011) was used as the pre and post-processor to construct the model, generate input files, run MODFLOW-SURFACT, and analyze model results." Groundwater Vistas is an industry-standard software package used in groundwater modeling.

In particular, I am looking for two files. One file will describe the model used in calibration and the second file will describe the model used for predictive simulations. The second of these has a higher priority for me. The suffix for these files is *.gwv.

Given that the Co-Operating Agencies have been given a 60 day timeline to review and comment on the draft SEIS, I would appreciate receiving the files in electronic form at your earliest convenience.

Thank you,

A handwritten signature in cursive script that reads "Heather Kendall Miller".
